

A3 Rubric

Category	Points	Weight (%)	Requirements for Full Marks	Marks (/2 Each)	Section Total	Weighted	Notes
The Five Behaviors (Conceptual core)	10	40%	• 5 distinct misbehaving behaviors implemented and clearly intentional	2	10.0	0.4	
			• Each behavior is commented in the code with design intent	2			
			• At least 3 instances of CSS properties changed dynamically via JavaScript	2			
			• At least 3 instances of elements added to or removed from the DOM	2			
			• Behaviors feel crafted and purposeful — not accidental or trivially random	2			
"disruption of spectatorial mastery"	2	15%	Give the user/visitor a motivation to WANT to interact with the frustrating elements on your page.	2	2.0	0.15	
Technical Requirements (HTML, CSS & JS)	14	25%	All multi-word JavaScript identifiers (variables, functions, parameters) use camelCase formatting (e.g., firstName, calculateTotal, isLoggedIn).	2	14.0	0.25	
			• At least 5 different UI element types in index.html (buttons, inputs, sliders, checkboxes, select menus, etc.)	2			
			• Each UI element is connected to and interacts with JavaScript	2			
			• Folder structure correct: index.html, style.css, script.js at root	2			
			• Page resets cleanly on browser reload (no persistent broken state)	2			
			• No significant console errors that break intended behavior. If any console errors persist, document them as a github issue so that I know that you are aware of them!	2			
			• External stylesheet (style.css) and script (script.js) properly linked	2			
Git Workflow & Repo (Branching & history)	12	10%	• Repo named exactly a3-misbehaving-interface	2	12.0	0.10	
			• Minimum 10 branches created from other branches, all pushed to GitHub	2			
			• Minimum 30 commits with meaningful messages (explains what AND why; 'update' or 'fix' alone = mark deduction)	2			
			• At least 3 merge commits	2			
			• 5 commits identifying when each behavior was completed, noted in the commit message	2			
			• Live page published via GitHub Pages	2			
Index Page & Documentation (Links & annotations)	6	5%	• username.github.io links to: A3 live page and A3 GitHub repo	2	6.0	0.1	
			• 5 significant/favourite commits linked on index page, each with 1–2 sentence annotation	2			
			• username.github.io URL submitted to Brightspace A3 assignment page	2			
The Paper Trail (Comments & process)	6	5%	• Every significant block of HTML, CSS, and JS has a comment explaining what it does and why	2	6	0.1	
			• Commented-out code left in files to show discarded experiments	2			
			• Comments for each of the 5 behaviors specifically identify the design intention	2
